

C3 EmailSecurity

It's time to communicate safely online!

EMAIL SECURITY WITHOUT COMPROMISE

Having Multi-layer Security is more important for businesses than ever before. One component of our Multi-layer Security Stack is C3 EmailSecurity, which offers businesses advanced protection and management of their mailboxes. In a time where we are the biggest targets to online predators looking for victims to prey on, not having a leading email security solution leaves businesses extremely vulnerable. With C3 EmailSecurity, you can have full peace-of-mind that your business is protected, whether you're emailing directly from your device, or via the web.

SUPERIOR SPAM
& VIRUS FILTER

ADVANCED THREAT
PROTECTION

EMAIL CONTINUITY
ACTIVATED IN EMERGENCIES

EMAIL ENCRYPTION FOR
GREATER CONTROL

EFFORTLESS EMAIL
ARCHIVING

INCLUDED FEATURES

OPTIONAL ADD-ONS

- ✔ Spam is something that people used to consider a mere annoyance; nowadays however, the capabilities of spam have progressed to being the delivery system for spyware, keystroke loggers, malware & more. The need for businesses to ensure they have a superior spam & virus filter is extreme in today's cyber world. C3 EmailSecurity provides just that - a mailbox filter with a spam & virus detection of 99.9%.
- ✔ Most email filtering systems only protect from generic virus & spam emails - with Advanced Threat Protection, C3 EmailSecurity ensures you are protected from higher grade threats like CEO fraud, spearphishing, malware & more - most of which are invisible to regular filtering systems.
- ✔ As most businesses rely heavily on emails as a form of communication both internally and externally, it is important that a plan is in place in case of a disaster that makes emails unavailable. C3 EmailSecurity boots up in these instances, ensuring that no emails are lost, and employees can continue to send and receive emails.
- ✔ C3 EmailSecurity has the optional add-on of Email Encryption. This application gives your business complete control over admin rights, meaning you can define the rules & policies of your mailboxes, including which emails are let through, as well as see an overview of all email traffic. Storing emails securely is critical. Another optional add-on of C3 EmailSecurity is Email Archiving in highly secure Australian Data Centres, allowing you to rest assured knowing that your data is well protected.
